Tofycoin Intro

ABOUT US

Tofycoin is a cryptocurrency that operates in the NFT area and can be used as a payment system in mobile, web and pc games. By using the technological infrastructure for both its own games and partner companies, Tofycoin is building a gaming ecosystem.

The total supply of TOFYCOIN has been fixed at 100,000,000 tokens. Tofycoin will not be burned through use, but instead will be reintroduced back into the economy after it is used by players to pay for gameplay fees and NFT purchases and upgrades.

Tofycoin allows holders to enter skill-based tournaments, purchase and upgrade game characters and other in-game items, as well as engage in the governance layer of the ecosystem that allows voting on platform roadmap, new game content, and creation of prize pools.

Game developers can integrate their games into the Tofycoin platform and earn 20%-70% revenue. Tofycoin will provide platform support by integrating our \$TOFY tokens, leveraging our in-house technology and playable NFTs.

Fellow P2E game partners can partner with Tofycoin to bring their games and benefits from our community for Free. All you need to do is to bring quality games that our players will love and we will do the rest.

VERY SOON

TOFY

PLAY TO EARN

Worion

Tofycoin can be earned by playing Tofycoin integrated games (play to earn).

The first game that is presented by Tofycoin is "Worion" and players will earn Tofycoin as a reward for achievements or high rankings by playing the first FPS (first person shooter) game.

Tofycoin Ecosystems

CLOUD BASED
